

Proving the Best in Home Healthcare

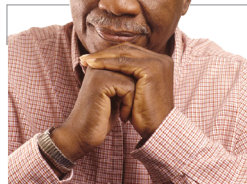

Diamond Home Healthcare is committed to providing comprehensive, quality care to aid our clients in becoming productive, healthy, and happy in all facets of their lives.

We started Diamond Home Healthcare because we once needed help caring for a loved one and we didn't know where to turn to for help. Who could we trust to give her the care she needed and deserved? We know the decision is a difficult one when you are faced with needing help just to achieve daily tasks. When your loved one wants to live in the comfort and familiarity of their home, we can provide the support and security that can make that possible. You want the best for your loved one. However, between work and family life, it can be hard to be there all the time. Diamond Home Healthcare understands that it is important that you have someone in your home

that you can trust and depend on. You can trust us to make sure your loved one is in good hands.

We carefully select all our caregivers. They must share our passion and love for people. To ensure your comfort and safety, our caregivers are background checked, experienced, licensed, certified and/or bonded. All of our services are customized to fit your needs. We work closely with each client, family and healthcare provider to develop a personalized plan just for you. We perform a complete in-home assessment to determine your specific needs to ensure your loved one has the best quality of life possible.

All Diamond Healthcare caregivers are "loved one" approved. Guaranteed! We will provide a caregiver with whom you can feel comfortable. We believe compatibility between client and their caregiver is critical. To ensure your peace of mind you have the option to interview the caregiver and choose the one that's right for you. Your complete satisfaction is our goal!

We provide:

- On call caregivers for immediate responsiveness.
- Relief to work, run errands or for 24 hours seven days a week.
- Assistance in finding resources and financial aid to help families struggling to afford home services.
- Review of systems for continuous examination of the care clients are receiving from the agency.
